Updates - Regulation of Minister of Employment No. 30 of 2016 on Guidelines on the Establishment and Administration of One-Stop Service Agency for International Placement of Workers

On 6 October 2016, the Minister of Employment issued a regulation to facilitate and protect the international placement of Indonesian workers, which became effective on the date it was issued. The regulation is a basis of the establishment and administration of a one-stop service agency at the province/regency/municipality level in order to provide placement and protection services for Indonesian workers. The one-stop service agency is meant to handle the process from the registration stage until the issuance of departure documents stage for Indonesian workers. The team for the one-stop service agency will be determined based on a governor/regent/mayor decree.
